To Schedule a Dysphagia Consultation Please FAX the Order Form(s) to 978.279.1066

(All forms can be downloaded at www.massteximaging.com)

Out Patient, Home Care, Assisted Living Facilities, Dayhabs, Group Homes and Physician Offices

1. A COMPLETED ORDER FORM to include:

- ✓ **Physician/NP/PA Orders:** You may use the MassTex Imaging ORDER FORM by having the ordering MD, NP or PA sign section 6b (Please print their name legibly in section 6a per Medicare Guidelines) or the MD/NP/PA can submit their own order form.
- ✓ **Medical History/Clinical Information:** Please fill sections 7 through 10 completely for the Physician to review prior to seeing your patient.
- ✓ **Insurance Information:** For **Managed Care Patients**, MassTex Imaging will contact you and assist with the authorization process.
- ✓ Face Sheet/Demographic Data/Emergency Contact Sheet from the patient's medical record or chart.
- ✓ **Scheduling Restrictions:** Please indicate any scheduling restrictions in section 11 "Scheduling Restrictions" and we will do our best to accommodate the patient's needs. Please note that scheduling restrictions may delay the scheduling of your patient.

2. A COMPLETED CONSENT FORM to include:

- ✓ **Verbal Consent:** The patient's or the invoked Health Care Proxy's consent to the consultation/procedure.
- ✓ Party Who Obtained Verbal Consent: Legibly printed name, title and signature.

3. FACILITIES WITH ELECTRONIC MEDICAL CHART please fax the following:

- ✓ **History and Physical (H&P):** Copy of the most recent and complete H&P. If the patient is a long-term patient that has not had an H&P recently, please send a recent progress note as a second option.
- ✓ **Medications Along with Allergies:** List of current medications and any known allergies.

4. UPON MTI RECEIPT of FAXED ORDER FORM(S) and necessary documentation:

- ✓ **Order Form(s) Confirmation:** The referring clinician or scheduling contact will receive a same day confirmation call or text confirming receipt of order form(s) as well any missing documentation.
- ✓ **Appointment scheduling:** The day before the scheduled appointment the **scheduling contact** will receive a phone call confirming the "two hour" time window for the Dysphagia Consultation. **Please note,** if a cancellation occurs on the day your patient is being seen an earlier arrival time may occur prior to the "two hour" time window. You will be notified if the time window changes.

5. CANCELLATION POLICY:

✓ **Please notify MassTex Imaging immediately** if the Dysphagia Consultation needs to be cancelled. Failure to notify us may result in a travel/cancellation fee to your facility should we arrive and the patient is not on the premises.

Patient Information from MassTex Imaging, LLC

Regarding Consent for a Dysphagia Consultation including Modified Barium Swallow & Esophageal Assessment to Stomach

Your physician has ordered a Dysphagia Consultation which may include a Modified Barium Swallow & Esophageal Assessment to the Stomach via videofluoroscopy. This order has been sent to MassTex Imaging, LLC, a Mobile Medical Practice. A Dysphagia Consultation including MBSS and Esophageal Assessment to the Stomach will only be carried out with verbal or written consent provided by you or your health care proxy (if invoked).

What is a Dysphagia Consultation, Modified Barium Swallow and Esophageal Assessment to the Stomach? A Modified Barium Swallow (MBSS) and Esophageal Assessment to the Stomach are video x-rays that allow us to examine your oral, pharyngeal and esophageal swallow mechanisms. Video x-rays (Videofluoroscopy) allow us to watch you swallow as it happens by watching liquid and food mixed with barium travel from your mouth into the stomach. These assessments will provide information about the cause of your swallowing difficulty and whether food or liquids are going into your airway. As part of the consultation, this information is then used by our clinical team to recommend how best to improve your safety and comfort while swallowing. Additionally, this information is also used to help plan your swallowing therapy plan of care.

What will happen? Our mobile medical clinic will come to your location. Our driver technician will bring you onto our mobile clinic and you will be seated beside the x-ray machine. You will not be asked to lie down. Family members and your medical team are welcome to attend with your permission.

The MassTex Imaging Speech Pathologist will give you foods and liquids to swallow. These food and liquids will be mixed with barium. Barium is used because it is easily seen under x-ray. Barium is chalky but not unpleasant and you will only be given small amounts. You may be asked or helped to change your position on the seat. Our physician will record each swallow digitally. Our Physician will exam you as well as review your medical record to determine health risks that may increase your risk of developing an aspiration pneumonia, review the medications you are currently taking to determine if they may affect your swallow mechanism, recommended further consultations as needed and provide diet, strategies and therapy recommendations to help you and your medical team manage any swallowing problems identified. Once the consultation is concluded you will be shown back to your room. The Physician and Speech Pathologist will then type a detailed report. These reports along with a DVD with audio of your videofluoroscopy x-ray exams will be sent to your medical team and referring physician.

Are there any risks or side-effects? This is a painless procedure and you may eat and drink normally before and after your appointment. Barium is harmless. It can cause a little constipation but this can be avoided by drinking plenty of fluid for the rest of the day after your consultation. Your stools may be paler than usual for the next few days. This is nothing to be alarmed about. It is just the barium passing through your system. All x-ray procedures involve some exposure to radiation and, as such, pose a degree of risk. Everyone is exposed to natural background radiation from the environment throughout their lives. One in 3 people will develop cancer at some point in their lives due to many various causes including environmental radiation. Radiation from a medical procedure involving x-rays can add very slightly to this risk. The length and level of exposure to radiation from x-rays in medical procedures is very strictly controlled and is kept to the minimum amount possible. The added risk of cancer due to this radiation is extremely small. Your doctor has determined that the risk to your health of not having this procedure is considerably greater than the risk from the radiation used.

How is my medical information disclosed? Your verbal or written consent gives MassTex Imaging, LLC authorization to use and disclose your medical information to bill and collect payment for services and to release the dysphagia consultation and radiological exams to you referring medical team.

Swallow studies may be used for research, publication and/or educational purposes. No identifying information will be disclosed for research/education or publication without written consent from you, maintaining strict confidentiality and HIPAA guidelines. *If you have any inquiries or require further information about your upcoming Dysphagia Consultation please contact us at 800.508.MBSS (6277) or 978.750.0300 and we would be happy to answer any questions.*

Thank you,

The MassTex Imaging Team

Day of Dysphagia Consultation

On the DAY of the appointment, the MassTex Imaging Medical team will call the listed contact 20 minutes prior to their arrival, allowing adequate time to prepare the patient for the appointment. Because cancellations do occur, we will notify you if we are going to be earlier than the given window of time. Please make sure that the patient as well as any family members or therapists attending the study be available earlier should this occur.

Checklist Prior to Medical Team Arrival			
	Patient is up and ready in a wheelchair with foot pedals or other chair to be transported onto the medical van. Please have the patient waiting in the lobby if possible.		
	Medical record to be ready to be brought out to the Medical Van.		
	Current height, weight and vitals from the day of visit.		
	Portable O2 set up prior to arrival (if appropriate).		
	If vent dependent, respiratory therapist or nursing staff must accompany patient and remain on the Medical Van during the consultation. Please make sure these staff members are ready and do not delay the consultation.		
	Provide any feeding equipment such as spoons, cups, etc that the patient may be using during eating/drinking.		
	Dentures in place if patient uses them to eat/drink.		
	Patient is dressed appropriately for the weather, e.g. coat for cold weather.		
Consu	2: MassTex Imaging needs to be notified immediately if the Dysphagia ltation needs to be cancelled. Failure to notify us may result in a travel/cancellation your facility should we arrive and the patient is not on the premises.		
provid MBSS Consu	lue the opportunity to assist you with the care of your patient. We look forward to ing your patients with a comprehensive dysphagia consultation specializing in , considered the GOLD Standard in swallowing studies along with a Physician lattion and an Esophageal Assessment to the Stomach. If you have questions please be to contact us. We are happy to help.
